

A B S T R A C T

Preparation for veterinary use.

- 5 It includes at least one keratolytic and cerumenilytic
cleaning agent, one bactericide agent, one yeast
control agent and one anti-irritant and anti-
pruriginous agent. Furthermore, it may include at least
one agent that enhances its cerumenilytic properties,
10 at least one vegetable extract with antiseptic and
cicatrizant properties and/or at least one deodorant
agent.

- The agent with cleaning keratolytic action and
cerumenilytic is lactic acid, salicylic acid, or a
15 mixture of the two. The bactericide agent is *Cetraria*
islandica extract. The yeast control agent is lactic
acid, salicylic acid or a mixture of the two. The anti-
irritant and anti-pruriginous is a vegetal extract of
20 *Cucumis sativus*. The agent that enhances the
cerumenilytic effect is oleic acid. The vegetal extract
is *Mimosa tenuiflora* extract, *Cetraria islandica*
extract, *Camomilla recutica* extract or a mixture of
them. The deodorant is *Cetraria islandica* extract.
